Required information: Maximum static pressure Minimum design pressure

95% of time pressure Max flow at zero residual pressure

Pressures at the following flows: 5 l/sec 10 l/sec 15 l/sec

20 l/sec 25 l/sec 30 l/sec

Acknowledgment

I understand and accept that:

- Flow and pressure information provided by Central Highlands Water (CHW) is obtained from a model that is calibrated to a select number of locations which is used for planning purposes and may vary to actual pressures and flows.
- The results may be used for design purposes, but a physical test should also be undertaken to confirm results.
- The information provided may not be suitable for CFA dispensation.
- Future pressures and flow rates provided are expected to change and may change without notice.
- Fire services must be installed and maintained at your expense in accordance with AS1851, which includes annual water supply proving tests.
- The applicant named below expressly acknowledges that CHW accepts no responsibility or liability resulting from any variations in the estimation provided herein and actual flows, nor will CHW accept any damage resulting from the applicants failure to install and maintain the fire service in accordance with the applicable Australian Standards, and the applicant hereby indemnifies and releases CHW in relation to same.
