

PROPERTY SEWERAGE PLAN REQUESTS

Central Highlands Water customers, plumbers, solicitors and conveyances can access plans of existing property sewerage drains from a network of conveniently located plumbing outlets or direct from Casey Inspection Services.

Why does Central Highlands Water outsource its plan service to Casey?

Providing our customers with fast and accurate access to existing drainage plans is important to us. With the assistance of Casey Inspection Services, original plans dating back many years have been electronically imaged and redrawn where necessary. Casey Inspection Services can provide a quality legible plan that can be easily faxed, emailed or posted to you.

How does this new service operate?

If you are a **plumber**, the easiest and most convenient method of obtaining a plan is through your local plumbing supplies outlet. Simply fill out an application form and they'll send it to Casey Inspection Services. Your updated plan(s) are then faxed back to the plumbing store, emailed directly to you, or to a location of your choice generally within 10-15 minutes (maximum 30 minutes).

If you are a **solicitor**, **conveyancer** or **real estate agent**, you may wish to open an account with Casey Inspection Services. Accounts are available for all customers purchasing 10 or more plans per month.

If you are a **homeowner** or infrequent user, download an application form from www.chw.net.au, www.caseyinspections.com.au or phone Casey Inspection Services on 03 9835 5511 and provide your credit card details for payment – your plan(s) will be dispatched using your method of choice.

How much does this service cost?

A fee of \$32.00 per plan will be charged to access an updated service plan. This fee is GST exempt, credit card charges may apply.

Who are Casey Inspection Services?

Casey Inspection Services Pty Limited, trading as Casey Plumbing Compliance (“Casey Inspections”) is a plumbing industry compliance auditing inspection firm. They undertake commercial operations predominantly within the plumbing, gas-fitting, drainage, building compliance, electrical and water industry sector of the building and construction industry.
